In the event of the improper use of the report. The Hong Kong Timeway Technology Development Limited reserves the rights to withdraw it and to adopt any other remedies which may be appropriate.

TEST REPORT

5. Disturbance Power Test

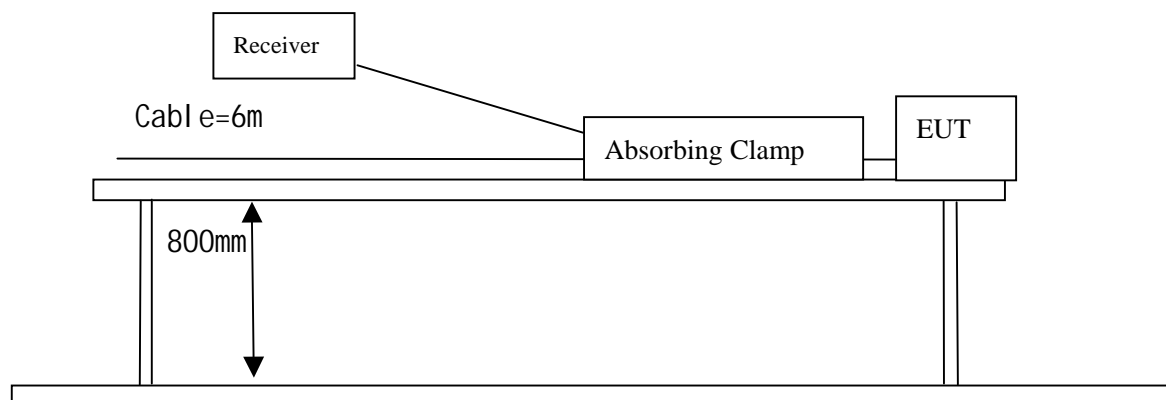

5.1 Schematics of the test

5.2 Test Method:

The test was performed in accordance with EN 55013:2001

Block diagram of Test setup

5.3 Results and limits line for Distance power (230V ac 50Hz)

Limits for Disturbance power Test, Please refer to limit lines (Quasi-peak) in the following diagram labelled as (QP)

A: Conducted Disturbance Power on AC LINE (30Hz to 300MHz)

EUT set Condition: Playing colour bar and 1k Hz signal

Results: Pass

Please refer to following diagram for individual

Date: 10.OCT.2004 15:56:52

Frequency (MHz)	Reading (dB μ V)		Limit (dB μ V)	
	Quasi -peak	Average	Quasi -peak	Average
65.08	25.04	24.37	46.30	36.30

The report refers only to the sample tested and does not apply to the bulk.
This report is issued in confidence to the client and it will be strictly treated as such by the Hong Kong Timeway Technology Development Limited. It may not be reproduced rather in its entirety or in part and it may not be used for advertising. The client to whom the report is issued may, however, show or send it or a certified copy thereof prepared by the Hong Kong Timeway Technology Development Limited to his customer. Supplier or others persons directly concerned. Hong Kong Timeway Technology Development Limited will not, without the consent of the client enter into any discussion of correspondence with any third party concerning the contents of the report.
In the event of the improper use of the report. The Hong Kong Timeway Technology Development Limited reserves the rights to withdraw it and to adopt any other remedies which may be appropriate.

TEST REPORT

B: Conducted Disturbance Power on Center (30MHz to 300MHz)

EUT set Condition: Playing color bar and 1k Hz signal

Results: Pass

Please refer to following diagram for individual

Date: 10.OCT.2004 16:16:35

Frequency (MHz)	Reading(dB μV)		Limit(dB μV)	
	Quasi -peak	Average	Quasi -peak	Average

- Test data shows much less than the limit, no necessary take down the results.

The report refers only to the sample tested and does not apply to the bulk.
This report is issued in confidence to the client and it will be strictly treated as such by the Hong Kong Timeway Technology Development Limited. It may not be reproduced rather in its entirety or in part and it may not be used for adverting. Supplier or others persons directly concerned. Hong Kong Timeway Technology Development Limited will not, without the consent of the client enter into any discussion of correspondence with any third party concerning the contentsw of the report.
In the event of the improper use of the report. The Hong Kong Timeway Technology Development Limited reserves the rights to withdraw it and to adopt any other remedies which may be appropriate.

C Conducted Disturbance Power on FL FR (30MHz to 300MHz)

EUT set Condition: Playing color bar and 1k Hz signal

Results: Pass

Please refer to following diagram for individual

Date: 10.OCT.2004 16:12:52

Frequency (MHz)	Reading(dB μ V)		Limit(dB μ V)	
	Quasi -peak	Average	Quasi -peak	Average
57.92	29.18	26.88	46.00	36.00
65.12	35.26	34.60	46.30	36.30
72.32	33.57	32.58	46.56	36.56

The report refers only to the sample tested and does not apply to the bulk.
This report is issued in confidence to the client and it will be strictly treated as such by the Hong Kong Timeway Technology Development Limited. It may not be reproduced rather in its entirety or in part and it may not be used for adverting. The client to whom the report is issued may, however, show or send it . or a certified copy there of prepared by the Hong Kong Timeway Technology Development Limited to his customer. Supplier or others persons directly concerned. Hong Kong Timeway Technology Development Limited will not, without the consent of the client enter into any discussion of correspondence with any third party concerning the contentsw of the report.
In the event of the improper use of the report. The Hong Kong Timeway Technology Development Limited reserves the rights to withdraw it and to adopt any other remedies which may be appropriate.

D: Conducted Disturbance Power on Output Cen(30MHz to 300MHz)

EUT set Condition: Playing color bar and 1k Hz signal

Results: Pass

Please refer to following diagram for individual

Date: 10.OCT.2004 16:30:25

Frequency (MHz)	Reading (dB μV)		Limit (dB μV)	
	Quasi -peak	Average	Quasi -peak	Average

- Test data shows much less than the limit, no necessary take down the results.

The report refers only to the sample tested and does not apply to the bulk.
This report is issued in confidence to the client and it will be strictly treated as such by the Hong Kong Timeway Technology Development Limited. It may not be reproduced rather in its entirety or in part and it may not be used for adverting. The client to whom the report is issued may, however, show or send it or a certified copy there of prepared by the Hong Kong Timeway Technology Development Limited to his customer. Supplier or others persons directly concerned. Hong Kong Timeway Technology Development Limited will not, without the consent of the client enter into any discussion of correspondence with any third party concerning the contentsw of the report.
In the event of the improper use of the report. The Hong Kong Timeway Technology Development Limited reserves the rights to withdraw it and to adopt any other remedies which may be appropriate.

TEST REPORT

E: Conducted Disturbance Power on Output FL FR (30MHz to 300MHz)

EUT set Condition: Playing color bar and 1k Hz signal

Results: Pass

Please refer to following diagram for individual

Date: 10.OCT.2004 16:23:25

Frequency (MHz)	Reading (dB μ V)		Limit (dB μ V)

TEST REPORT

9.0 Electrostatic Discharge

9.1 Schematic of the test

9.2 Test method

The test was performed in accordance with EN 61000-4-2:1995

9.3 Test severity

± 4kV for direct & in-direct Contact Discharge

± 8kV for air Discharge

Performance Criterion Require: B (Please see following table)

9.4 Susceptibility performance Criteria and Severity level

A	Normal performance within the specification limits
B	Temporary degradation or loss of function or performance which is self recoverable
C	Temporary degradation or loss of function or performance which requires operator intervention or system reset
D	Degradation or loss of function which is not recoverable due to damage of equipment(components) or software, or loss of data

The report refers only to the sample tested and does not apply to the bulk.

It may not be reproduced rather in its entirety or in part and it may not be used for advertising. The client to whom the report is issued may, however, show or send it, or a certified copy thereof prepared by the Hong Kong Timeway Technology Development Limited to his customer, supplier or other persons directly concerned. Hong Kong Timeway Technology Development Limited will not, without the consent of the client enter into any discussion of correspondence with any third party concerning the contents of the report.

In the event of the improper use of the report, The Hong Kong Timeway Technology Development Limited reserves the rights to withdraw it and to adopt any other remedies which may be appropriate.

Severity Level

Level	Test Voltage Direct & in-direct contact Discharge (kV)	Test Voltage Air discharge(kV)
1	$\pm 2\text{kV}$	$\pm 2\text{kV}$
2	$\pm 4\text{kV}$	$\pm 4\text{kV}$
3	$\pm 6\text{kV}$	$\pm 8\text{kV}$
4	$\pm 8\text{kV}$	$\pm 15\text{kV}$

9.5 Test Result

Please refer to the following table for individual results.

Location	Discharge Method	Test Voltage	Results
HCP (Horizontal coupling plane)		$\pm 4\text{kV}$	Pass
VCP (Vertical Coupling plane)		$\pm 4\text{kV}$	Pass
		$\pm 4\text{kV}$	Pass
Enclosure		$\pm 4\text{kV}$	Pass
Enclosure		$\pm 8\text{kV}$	Pass
		$\pm 8\text{kV}$	Pass

Remark: Calculated measurement uncertainty= $\pm 0.2\text{kV}$

10. Product Labeling

10.1 CE Mark label specification

Text of the mark is black or white in color and is left justified. Labels are printed in indelible ink on permanent adhesive backing and shall be affixed at a conspicuous location on the EUT or silk-screened onto the EUT.

10.2 Mark location On the rear enclosure
